1. Introduction

The Genesee Transportation Council (GTC) provides annual funding for the Regional Land Use Monitoring Report (LUMR) under its Unified Planning Work Program. The purpose of this report is to provide information for building permits by type, size, and value to identify areas of growth within the Genesee/Finger Lakes (G-FL) Region that may, as a result, require increased transportation planning and services.

The Regional Land Use Monitoring Report includes residential, industrial, commercial, community service, and mixed use building permit data for all nine counties in the G-FL Region. This includes subdivision applications and permitted demolitions, as well as rezoning and conversion applications and the number of upgrades and remodels per municipality. The categories (and associated subcategories) for building permit data are as follows:

Residential	Industrial	Commercial	Community Service	Mixed Use
Not Elsewhere Classified	Subdivision Applications	Rezoning/ Conversions	Demolition by Permit	Remodel/ Upgrade

A five-year trend analysis is provided for permitted residential units in all nine counties and industrial, commercial and community service building permits are analyzed over the five-year period. This time-series analysis is based on this year's and the four previous years' Land Use Monitoring Reports produced by the Genesee/Finger Lakes Regional Planning Council (G/FLRPC). The MPA consists of Monroe County plus the adjacent developed areas of Livingston, Ontario, and Wayne counties. Table 1 represents the municipalities that, along with Monroe County, comprise the MPA. An analysis of the collected data on the number, value, and size of buildings permitted in 2022 is provided for each county as well as the MPA. The data on permitted building activities are provided in appendices at the end of this report for the reader to use for their own needs and analysis.

2. Methodology

The building permit data included in this report was collected through surveys sent to the municipal or county officials responsible for the collection and dissemination of such data in the nine counties. In six counties, these officials were often the code or zoning enforcement officers and in some cases were the municipal clerks. In Seneca and Wyoming Counties, building permit application approval and inspection are the responsibility of the respective county building departments and thus these departments provided the relevant data. In Monroe County, the Planning and Development Department's Division of Planning administered the surveys, received the responses from municipal officials in the County, and forwarded the data to G/FLRPC.

As noted above, each municipality other than Seneca and Wyoming Counties received a survey in January of 2022 ask-ing for the requested data. The initial survey was followed up with reminder e-mails and telephone calls to those municipalities that had yet to respond. Once it was determined data was not available from the municipalities, building permit was sourced first from the Census Bureau Building Permit Report and from the NYS DOS 2022 Annual Uniform Code Report if not other sources were available.

G/FLRPC received 76% of the region's responses from the survey that was administered. This represents 143 of the 188 reporting municipalities within the nine-county G-FL Region. Additionally, 19.5% of the region's data was pulled from either the Census Bureau or the New York State Department of State 2022 Annual Uniform Code Report. Overall, data was gathered from 95% of the region, accounting for 179 municipalities out of 188 having data available to use in this report.

The US Census Bureau Building Permit Data Report categories are closely matched to the G/FLRPC Land Use Monitoring Re-port Survey in residential categories. The Uniform Code Report is filled out annually by most municipalities. Its data very loosely overlaps with the topics of the G/FLRPC Land Use Monitoring Report Survey. The Residential building permit categories cover "One-family dwellings, two-family dwellings, and townhouses, new construction" and "Other residential occupancies, new construction." There is one question on the form that covers all categories under "Nonresidential buildings, new construction." And there are four questions covering the one "Upgrades/Repairs" section of the G/FLRPC Land Use Survey. These are as follows "One-family dwellings, two-family dwellings, and townhouses. Repairs, alterations, etc. of existing", "Other residential occupancies, repairs, alterations, etc. of existing", "Nonresidential buildings, repairs, alterations, etc. of existing", and "All other permits

(pools, sheds, decks, plumbing, HVAC, etc)." The data reported on the G/FLRPC survey and the NYS DOS Uniform Code report did not always report or reflect the exact same numbers.

The survey requested information on the number of permits issued, and the total square footage and total value for buildings in the defined categories and associated subcategories. The total square footage and total value is intermittently reported based on municipal records. In addition, the same building permit information for buildings outside of these categories was requested along with a description of the type of building(s) in the "Other" category. In some cases descriptions were not provided. The analysis conducted in this report is based on data provided by each LUMR survey contact.

The instructions for completing the survey were as follows:

"Include permits for NEW construction of PRINCIPLE STRUCTURES permitted in the 2022 calendar year. **New** Report Remodels/Upgrade permits separately. Please do separate surveys for each municipality you represent and answer ALL questions in each section."

For each of the nine counties, there is a discussion of permitted building activity in 2022 by county and county maps of residential units permitted in 2022 by municipality. Maps 10 – 18 represent each County's residential permits. Map 19 represents the 5-year residential permitted units in the nine-county G-FL Region. Map 20 represents residential permits for the region in 2022 by municipality. Map 21 represents residential units in the nine-county G-FL Region by municipality in 2022. Data of industrial, commercial, community service building permits, and remodel/upgrade permits issued in 2022 are presented on maps of the nine-county G-FL Region. See Maps 22-25.

The information and data provided for permitted building activity in Monroe County and the remaining portion of the MPA follows the same format. Maps 26 and 27 present the number of residential permits, and permitted residential units respectively in the MPA region in 2022. Maps 28 through 30 present the number of permitted industrial, commercial, and community service buildings in the MPA in 2022. Map 31 shows the distribution of residential building permits among the Transportation Analysis Zones (TAZ) within the MPA outside of Monroe County.

The residential data for MPA municipalities were used in a time series analysis of the number of residential units permitted by municipality for the years 2012 through 2022. The number of permits issued for industrial and commercial buildings from 2012 to 2022 in the MPA outside of Monroe

County is also presented and discussed in the same manner.

The data gathered on number of building permits issued, square footage, and value in each category/subcategory by municipality in, and for the MPA, outside Monroe County are presented in Appendices A through J. The Appendices are as follows:

7. Transportation Analysis Zones

Addresses of residential building permits issued in 2022 were collected from municipalities located within the Metropolitan Planning Area (MPA) outside of Monroe County. Addresses were then geocoded using Geographic Information System software to determine which Transportation Analysis Zone (TAZ) each permit was located in. Some addresses did not geocode accurately and were manually moved to the approximate location based on a review of aerial imagery. And not all municipalities reported addresses for the building permits. As the transportation analysis zones tend to follow road boundaries this should not impact the accuracy of the number of permits per transportation analysis zone.

Map 31 shows the number of residential permits issued in each TAZ in the MPA outside of Monroe County in 2022.
